Memo to File:

New Pending file
Re: Proposed Precious Metal Quarry
Getty Minerals
South End of Oquirrh Mtns.

Mr. Tom Gast, of T.R.C. Consultants, Denver, was in today to discuss filing procedures for his client, Getty Minerals. They are presently in a very primitive planning stage for a proposed precious metals quarry located in the Mercur Mining District of the Oquirrh Mountains. They are presently still working out details of land and mineral acquisition and plan to possibly do some exploration drilling this spring and summer. There is also the possibility of a processing mill associated with the quarry, and details of obtaining BLM special-use permits and rights-of-ways have to be worked out. Basically, Mr. Gast wanted to touch base with the Division to discuss what was needed by the operator before final plans are initiated.
